

Reporting on enterprise value Illustrated with a prototype climate-related financial disclosure standard

ı

Description / Abstract

Five leading organisations in sustainability and integrated reporting, who published a shared vision for a comprehensive corporate reporting system earlier this year, have taken a next practical step together. To coincide with the fifth anniversary of the Paris Agreement, the group have published a paper that addresses one part of this system: standards for reporting on enterprise value, brought to life with a prototype climate-related financial disclosure standard.
