3rd Environmental Performance Review of Kazakhstan

Description / Abstract

The present publication contains the third Environmental Performance Review of Kazakhstan. The report takes stock of progress made by the country in the management of its environment since 2008. It covers legal and policy frameworks, greening the economy, environmental monitoring, and public participation and education for sustainable development. Furthermore, the EPR addresses issues of specific importance to the country related to air protection, biodiversity and protected areas, as well as water, waste and chemicals management, industry, agriculture, energy and health. It also examines the efforts of Kazakhstan to integrate environmental considerations into its policies in the transport, energy and industry sectors. The review further provides a substantive and policy analysis of the country’s climate change adaptation and mitigation measures and its participation in international mechanisms.

The publication is aimed at officials and experts working for public authorities responsible for environmental policy, representatives of civil society, the business community, academia and the media.
