The MSP Guide: How to Design and Facilitate Multi-stakeholder Partnerships

|

Author(s)

Brouwer, Herman Woodhill, Jim

Description / Abstract

In recent years, multi-stakeholder partnerships (MSPs) have become popular for tackling the complex challenges of sustainable development. This guide provides a practical framework for the design and facilitation of these collaborative processes that work across the boundaries of business, government, civil society and science. The guide links the underlying rationale for multi-stakeholder partnerships, with a clear four phase process model, a set of seven core principles, key ideas for facilitation and 60 participatory tools for analysis, planning and decision making.

The guide has been written for those directly involved in MSPs – as a stakeholder, leader, facilitator or funder – to provide both the conceptual foundations and practical tools that underpin successful partnerships.
