IWRM Training Manual 1: Principles and Practices of Integrated Water Resources Management

|

Author(s)

Baloyi, Xanani

Description / Abstract

The main objective of this first training manual is to introduce stakeholders to the basic concept, principles and practice of integrated water resources management (IWRM). The learning outcome being to help these stakeholders develop a working understanding of IWRM which can translate into accelerated implementation and improved water resources management in the Rift Valley Lakes basin. The training takes into consideration and build on participants' prior knowledge and experiences of working in the water sector. It is participatory and adopts a social learning approach.
