

 RESOURCE

Evidence-Based Policymaking: What is it? How does it Work? What relevance for Developing Countries?

|

Description / Abstract

The aim of this work is to identify lessons and approaches from EBP in the UK which may be valuable to developing countries. The issues, approaches and tools presented are based on the assumption that the reader is a progressive policymaker in a developing country, who is interested in utilising EBP. The focus is on policymakers within the public sector, rather than those working within the private sector or civil society.

Publication year

2005
