RESOURCE

Negotiation and mediation techniques for natural resource management

Author(s)
Engel, Antonia Korf, Benedikt

Description / Abstract
This publication is about how to help people to deal with conflicts that are undermining or disrupting natural resource management, impeding development, and causing outbreaks of violence. It looks at how negotiation and consensus building can be used to manage conflict and build collaboration, and provides practical, step-by-step guidance on how to establish and manage a process of consensual negotiations involving multiple stakeholders. The guide is intended for practitioners working on participatory/collaborative natural resource management and rural livelihoods projects.
