Mediating Water Use Conflicts in Peace Processes

|

Author(s)

Mason, Simon Blank, Dorothea

Description / Abstract

The aim of this document is to help mediators working on peace processes to address water issues. The document argues that the mediation of water conflicts differs somewhat from the mediation of other conflicts, and peace mediators should be aware of this if they are to deal adequately with water-related issues in complex political peace processes. This guidance note primarily addresses peace mediators who are not familiar with water conflicts.
