RESOURCE

Assuring Environmental Compliance: A Toolkit for Building Better Environmental Inspectorates in Eastern Europe, Caucasus, and Central Asia

|

Description / Abstract

The Toolkit presents good international practice in the field of management and operations of environmental inspectorates in order to:

- Stimulate the adjustment of inspection criteria and procedures currently applied in the EECCA.
- Help decision-making on the allocation of human and financial resources.
- Increase staff professionalism and integrity.
- Establish a more effective dialogue with the regulated community and the general public.
- Encourage in-country and international co-operation.

The Tool kit is designed to serve as a basis for developing and updating national inspection manuals, as the majority of described strategies and tools may be directly applicable, no matter what legal system exists in individual countries. The Toolkit is addressed to the employees of environmental inspectorates in the EECCA region – from senior managers to field inspectors, at national and sub-national levels.
