Water Footprint Assessment Manual: Setting the Global Standard

|

Author(s)

Hoekstra, Arjen, Y. Chapagain, A. K. Aldaya, M. M. Mekonnen, M. M.

Description / Abstract

This book contains the global standard for 'water footprint assessment' as developed and maintained by the Water Footprint Network (WFN). It covers a comprehensive set of definitions and methods for water footprint accounting. It shows how water footprints are calculated for individual processes and products, as well as for consumers, nations and businesses. It also includes methods for water footprint sustainability assessment and a library of water footprint response options.
