RESOURCE

Handbook on Water Allocation in a Transboundary Context

Description / Abstract

The ‘Handbook on Water Allocation in a Transboundary Context’ explains the various phases, benefits and challenges of transboundary water allocation and guides interested States through the process of assessing its potential usefulness in their shared basins. The Handbook contains 46 exemplar case studies highlighting key features of allocation and demonstrating their practical application in different transboundary water contexts around the world. It also helps build the capacity needed to address complex issues of water allocation, supports governments in establishing water allocation arrangements and, as such, sends a strong message on the importance, and feasibility, of transboundary cooperation and of adaptability. Last but not least, the Handbook presents the first-ever overview of water allocation agreements in transboundary waters.

Publication year
2021

Publisher
United Nations Economic Commission for Europe - UNECE

Keywords
Water Allocation Transboundary Basin

Format
Handbook

Thematic Tagging
