National Determined Contribution, 2021 (Updated); Tanzania, Un. Rep. of

|

Description / Abstract

This document is an update of the Intended Nationally Determined Contribution (INDC) that was submitted in 2015 by the United Republic of Tanzania to the United Nations Framework Convention on Climate Change (UNFCCC). Formulation of this NDC was undertaken and guided by the national policies, goals, vision, programme, plans and initiatives. The NDC is in line with the Tanzania Development Vision (2025) and Zanzibar Development Vision (2050), and the Third Five Year Development Plan (FYDP III). The NDC is also anchored in the National Climate Change Response Strategy (2021) and the Zanzibar Climate Change Strategy (2014). It also reflects and embraces other national development initiatives and frameworks such as blue economy, industrialization, implementation of county's strategic projects and plans, including Standard Gauge Railway network, Julius Nyerere hydropower project, and construction and improvement of transport systems and networks across the country. Moreover, this NDC is aligned with the Paris Agreement, UN 2030 sustainable development goals (SDGs) (2015) in particular SDG 13, and other closely related SDGs such as SDGs 1, 7, 12, 14, 15, 16 and 17, the New Urban Agenda (2016), agenda 2063 on the Future Africa We Want and Sendai Framework on Disaster Risk Reduction (2015).
