Technical Guide on Technologies for Non Conventional Water Resources Management

|

Author(s)

Antonakopoulou, Mariela Toli, Konstantina Kassela, Nassia

Description / Abstract

The current publication comprises the technical know-how we acquired throughout the 10-year implementation of the Non Conventional Water Resources Programme (NCWR) in the Mediterranean by GWP-Med and aims to serve as a quick reference guide on rainwater harvesting and greywater recycling systems. The Guide features various types and technologies, outlining selection and design criteria that can be helpful for professionals as well as individuals, who are exploring non conventional water resource solutions at domestic and community level.

Publication year

2017
