PROJECT FACTSHEET Fog Water Collection Pilot Study

|

Author(s)

Tremblay Levesque, Laurent-Charles

Description / Abstract

NACCFL is partnering with the Dhading Small Farmers' Agriculture Cooperative Federation Ltd. (SFACFL), CECI, FogQuest, and ENPHO to carry out the first fog water collection pilot study to be conducted in the hilly region of central Nepal. The goal of the pilot study is to evaluate the extent to which fog water collection is a safe, sufficient, accessible, and affordable source of water. The selected study site is a community of 29 households in Dhunibesi Rural Municipality, Dhading District.
