

RESOURCE

Integrated Flood Management as an Adaptation Tool for Climate Change: Case Studies

|

Description / Abstract

This Tool has been compiled on the basis of referenced sources and documented best practices. As such this tool provides a snapshot on the current state of using the IFM practices for climate change adaptation. This Tool addresses the needs of practitioners and allows them to easily access relevant guidance materials. The Tool is considered as a resource guide/material for practitioners and not an academic paper.

Publication year

2011

Publisher

Global Water Partnership - GWP World Meteorological Organization - WMO
