Foster the adoption of a Water-Energy-Food-Ecosystems Nexus approach in the Mediterranean through a Nexus Community of Practice (NCoP) to confront the climatic and environmental challenges facing societies and agro-ecological systems.

This project is part of the PRIMA programme supported by the European Union

www.wefe4med.eu

Objectives

Facilitate the identification, testing, dissemination and replication of Nexus solutions in the Mediterranean; showcase to policymakers and other stakeholders the advantages of Nexus approach using specific case studies; promote the deployment of regional demonstration sites as laboratories for replication, upscaling and policy design.

Scope of Work

✓ Convene

✓ Share knowledge

✓ Build capacities

How?

by deploying best practices and science-based policies and innovative solutions inspired by demonstration sites, showcasing the benefits of integrated natural resource management for sustainable, climate-resilient development in the Mediterranean.

Target Groups

Bringing together

Practitioners

Scientists

Policymakers

Civil society

Media

Entrepreneurs

Innovators

Investors

Project main steps

WEFE4MED will create and operate a structured and inclusive platform, providing a neutral space for enhanced interactions among sectors and stakeholders to demonstrate and unleash the power of a cooperative Nexus approach, and lead a green transformation of Mediterranean societies and economies.

This will be called NEXUS COMMUNITY OF PRACTICE (NCoP)

NCoP Methodology
